WHO WE ARE

ABOUT MEGA AGRI

Mega for Agricultural Investment has supplied Egyptian fruit and vegetables for 15 years, mainly ex-works to traders, packers and processors. Today we also export around 1,000 MT a year, and we are growing that programme with importers who value a steady, well-documented supply.

We do not buy on the open market. Our produce comes from 3,000 feddans of partner farms that work to our crop programme and are followed closely by our own agronomists.

15	~1,000 MT	4,000 MT	3,000	20–40 MT
years in the Egyptian produce trade	exported per year	annual supply capacity	feddans of partner farms under our supervision	packed per day, by season

HOW WE SUPERVISE OUR FARMS

01
Grown to our programme
Our agronomists choose varieties with each partner grower and set the irrigation and spray schedule.

02
Weekly field visits
Every block is visited weekly; residues are tested before harvest.

03
Released for harvest
A block is picked only after our team approves maturity and Brix.

04
Packed in New Nubaria
Pre-cooling, sizing and hand-grading in our packhouse, in your carton or ours.

WITH EVERY SHIPMENT

- ✓ Pre-shipment QC per lot
- ✓ Residue analysis to destination limits
- ✓ Phytosanitary certificate & certificate of origin
- ✓ Lot traceability: farm, block, harvest date
- ✓ Temperature logger in every reefer
- ✓ Private-label packing on request

ORANGES

Fresh citrus selected for appearance,
freshness and reliable export presentation.

VARIETY OVERVIEW
